

Complete Summary

TITLE

Epilepsy: the percentage of patients age 18 years and over on drug treatment for epilepsy who have a record of medication review involving the patient and/or carer in the previous 15 months.

SOURCE(S)

Brief Abstract

DESCRIPTION

This measure is used to assess the percentage of patients age 18 years and over on drug treatment for epilepsy with a record of medication review involving the patient and/or carer in the previous 15 months.

RATIONALE

Epilepsy is the most common serious neurological condition, affecting about 5 to 10 per 1000 of the population at any one time. Few epilepsies are preventable, but much of the handicap that results could be prevented by appropriate clinical management. For the purposes of the Quality and Outcomes Framework (QOF), epilepsy is defined as 'more than one seizure.' This measure is one of four [Epilepsy](#) measures.

The involvement of the patient and/or carer is included to stress the importance of a face to face medication review, where clinically appropriate.

PRIMARY CLINICAL COMPONENT

Epilepsy; medication review

DENOMINATOR DESCRIPTION

Patients age 18 years and over on drug treatment for epilepsy

NUMERATOR DESCRIPTION

Number of patients from the denominator who have a record of medication review involving the patient and/or carer in the previous 15 months

Evidence Supporting the Measure

EVIDENCE SUPPORTING THE CRITERION OF QUALITY

- A clinical practice guideline or other peer-reviewed synthesis of the clinical evidence
- A formal consensus procedure involving experts in relevant clinical, methodological, and organizational sciences

NATIONAL GUIDELINE CLEARINGHOUSE LINK

- [\(1\) Diagnosis and management of epilepsy in adults. A national clinical guideline. \(2\) Diagnosis and management of epilepsy in adults. Update to printed guideline.](#)
- [The diagnosis and management of the epilepsies in adults and children in primary and secondary care.](#)

CASE FINDING

Users of care only

DESCRIPTION OF CASE FINDING

Patients age 18 years and over on drug treatment for epilepsy*

*Note: The Quality and Outcomes Framework (QOF) includes the concept of exception reporting. This has been introduced to allow practices to pursue the quality improvement agenda and not be penalised, where, for example, patients do not attend for review, or where a medication cannot be prescribed due to a contraindication or side-effect.

The following criteria have been agreed for exception reporting:

- A. patients who have been recorded as refusing to attend review who have been invited on at least three occasions during the preceding twelve months
- B. patients for whom it is not appropriate to review the chronic disease parameters due to particular circumstances, e.g., terminal illness, extreme frailty
- C. patients newly diagnosed within the practice or who have recently registered with the practice, who should have measurements made within three months and delivery of clinical standards within nine months, e.g., blood pressure or cholesterol measurements within target levels
- D. patients who are on maximum tolerated doses of medication whose levels remain suboptimal
- E. patients for whom prescribing a medication is not clinically appropriate, e.g., those who have an allergy, another contraindication or have experienced an adverse reaction
- F. where a patient has not tolerated medication
- G. where a patient does not agree to investigation or treatment (informed dissent), and this has been recorded in their medical records
- H. where the patient has a supervening condition which makes treatment of their condition inappropriate, e.g., cholesterol reduction where the patient has liver disease
- I. where an investigative service or secondary care service is unavailable.

Refer to the original measure documentation for further details.

DENOMINATOR SAMPLING FRAME

Patients associated with provider

DENOMINATOR INCLUSIONS/EXCLUSIONS

Inclusions

Patients age 18 years and over on drug treatment for epilepsy

Exclusions

See "Description of Case Finding" field for exception reporting.

RELATIONSHIP OF DENOMINATOR TO NUMERATOR

All cases in the denominator are equally eligible to appear in the numerator

DENOMINATOR (INDEX) EVENT

Clinical Condition

Therapeutic Intervention

DENOMINATOR TIME WINDOW

Time window is a single point in time

NUMERATOR INCLUSIONS/EXCLUSIONS

Inclusions

Number of patients from the denominator who have a record of medication review involving the patient and/or carer in the previous 15 months.

Exclusions

Unspecified

MEASURE RESULTS UNDER CONTROL OF HEALTH CARE PROFESSIONALS, ORGANIZATIONS AND/OR POLICYMAKERS

The measure results are somewhat or substantially under the control of the health care professionals, organizations and/or policymakers to whom the measure applies.

NUMERATOR TIME WINDOW
